

If you have any recycled materials at home please feel free to send them to us. We will really appreciate it.

happy birthday

OCTOBER 5: ZOE  
 OCTOBER 26: NAYEF

**WELCOME TO OCTOBER ¡!!!** We had an amazing month adapting to our new class routines. Children are eager and excited to arrive to school. Now that we have adapted to our routine we will focus on learning our entire **Kinder curriculum**.

What will happen in OCTOBER.... This month we will be focusing on **number recognition and number writing; as well as learning our alphabet letters and sounds. Associating words with letters sounds and getting ready to read CVC words** (consonant vowel consonant words).

**Project:**

Our class project is about **"The EYES"** This month we will begin investigating all about EYES, *what do you know about the eyes?*, with this question we will begin our investigation project. This topic will last three months and will end in December. We motivate to talk and help us group different information; asking your child about this topic it's a good way to start a conversation.

**KINDER ROUTINE**

Pre-K has a very specific everyday routine with many activities and objectives to cover. **The children should be here before 7:55 am**; this gives them time to do their "sign-in" activity and get ready to start the adaptation into the classroom. After that we begin our morning circle. The activities that follow that first encounter of the day are: Math, Reading Workshop, Writing Workshop and Journals.

Every Tuesday we have music class, **on Thursdays Prekinder have P.E class. Wednesday and Friday they will have atelier class.**

**Homework will be sent everyday.... It is your child's responsibility to complete and work on the homework.**
